LEADERSHIP & CHAIRMAN REPORTS

HOUSE **GOP** PLAN FOR **ECONOMIC GROWTH**

and

JOBS

HOUSE **GOP PLAN FOR **ECONOMIC GROWTH & JOBS****

Our goal: help create new jobs today, make life work for families across the country, and expand opportunity for everyone – without expanding government.

ENERGY INDEPENDENCE

An “all of the above” approach that expands American energy production and approves popular projects like Keystone XL will make energy more affordable, bolster American manufacturing, and create jobs.

LOWERING HEALTH CARE COSTS & BOLSTERING RESEARCH

Repealing ObamaCare, focusing on patient-centered reforms, and shifting wasteful government spending towards disease and disorder research will improve care, and bring down the costs that strain families and make it harder for small businesses to hire.

EXPANDING EDUCATION OPPORTUNITY

Reforming federal education policies to empower parents with equal opportunity to seek great teachers and schools, and improve access to college and training, will better prepare students for tomorrow's job market.

SIMPLIFYING THE TAX CODE

A simpler, flatter tax code without all the loopholes will be fairer for everyone, bring jobs home, and help make American innovators and manufacturers more competitive.

CONTROLLING SPENDING

Stopping wasteful spending, strengthening priorities like Medicare, and replacing the president's sequester with smarter cuts and reforms that help us balance the budget – just like families do – will help pay down our debt and preserve the American Dream.

FOSTERING INNOVATION

Keeping the Internet free from government control, stopping cyber attacks while protecting our privacy, and modernizing our laws will help promote technological innovation and entrepreneurship.

REFORMING IMMIGRATION & BORDER SECURITY

Securing our borders, enforcing our laws, and making the process of becoming a legal immigrant fairer and more efficient will help America remain a magnet for the brightest minds and hardest workers.

REINING IN RED TAPE

Removing artificial government barriers and red tape will preserve and strengthen Americans' ability to build, grow, and compete with anyone.

EXPANDING MARKETS FOR MANUFACTURERS & SMALL BUSINESSES

Opening new markets for American-made goods will help lower prices for consumers, create better, higher-paying jobs for workers, and attract new investments in the United States.

STOPPING WASTE & FIXING BROKEN GOVERNMENT

Responsible oversight of government operations will help remove obstacles to growth and ensure accountability for taxpayers.

HOUSE REPUBLICAN CONFERENCE

LEADERSHIP & CHAIRMAN REPORTS

**We remain focused on solutions
that will foster robust economic
growth and create jobs for all
Americans.**

The status quo in Washington continues to make life difficult for hardworking taxpayers – keeping outdated laws and regulations on the books, imposing higher health care costs, and standing in the way of all-of-the-above energy solutions.

This week the House will consider the Working Families Flexibility Act of 2013, which would modernize an outdated federal mandate to give working parents more control of their time.
